2. Changes in future to be agreed

2.1 Links between D2Class DangerousGoodsDocuments::Carrier and ConnectingCarrier

If an alignment with Eu-Custom Code like the eFTI proposal is required, then 2 other links with a name respectively "masterLevel", and "houseLevel" should be introduced.

2.2 W3C Signature

Currently, the W3C signature is being integrated into the DATEX II dangerous goods namespace. For this purpose, the xmldsig-core-schema.xsd is integrated in the data model (source: https://www.w3.org/TR/xmldsig-core2). In the future, the signature will be integrated via the W3C namespace.

2.3 ADN 2023

The specific changes for ADN 2023 will be considered in the model version 01-04-00.
